Location	Project Title	McAllister Grant	Federal Match	Total Match	Total Cost	Acreage	Project Description	Local Support
Tree Utah	<i>Audubon/Tree Utah Migratory Bird Habitat Restoration Phase 2</i>	\$20,000					The project objective is to restore high quality migratory bird habitat along the Jordan River. This includes reactivating and enhancing old meanders, enhancing the Willow Creek Channel. removal of exotic species and planting native species.	
Summit County Basin Open Space Advisory Committee	<i>Parley's Creek Viewshed Preservation</i>	\$100,000					The Roberts Parcel is 46.7 acres in size. The properties are identified as an important viewshed in the Summit County General Plan as it is highly visible from the I-80 corridor.	Summit County, Utah Open Lands, Citizens Allied for Responsible Growth (CARG), Park City
Trust for Public Land	<i>Zollinger Farm</i>	\$300,000					The farm is approximately 90 acres in size, 49 acres owned by the Zollinger Family and 50 leased from other landowners. The farm was originally a fruit orchard but has since branched into a growing nursery stock for retail and wholesale sales. Roughly 10 acres is still in apples.	Cache County Council Senator Lyle Hillyard Representative Craig Butters, River Heights Providence City Cache County Extension Agency, USDA – Farm Service Agency
Draper City	<i>Draper Corner Canyon Easement Project</i>	\$500,000					Draper City will acquire a conservation easement on ~1,035-acres in Corner Canyon. This will allow conserve the property and its many resources for the residents of Draper and Salt Lake and Utah Counties to enjoy as recreational open space. .	Draper Cityl, USFS Utah Dept. of Natural Resources, State Representative Lavar Christiansen State Senator Howard Stephenson
The Nature Conservancy	<i>Selman Ranch Conservation Project</i>	\$420,000					protect key targets such as Columbian sharp-tailed grouse, Bonneville cutthroat trout and potential habitat for the boreal toad and goshawk, by removing the threat of habitat loss and connectivity due to development.	Utah Association of Conservation Districts Natural Resource Conservation Service Division of Wildlife Resources
The Nature Conservancy	<i>Boulder Creek Canyon</i>	\$400,000					The project area consists of 310+/- acres of cropland and pastureland along with a portion of Boulder Creek. Located in the heart of Boulder, there is a critical desert riparian area and a rich history in agriculture. continue grazing cattle in a planned and responsible manner and grow crops while still improving water quality and quantity in the creek, thereby protecting and enhancing habitat for numerous species of wildlife.	Boulder Town Council by Resolution

LERAY MCALLISTER CRITICAL LAND CONSERVATION FUND

Location	Project Title	McAllister Grant	Federal Match	Total Match	Total Cost	Acreage	Project Description	Local Support
Utah Botanical Center, Utah State University	<i>Improvements to Utah Botanical Center</i>	\$50,000					South Pond is contiguous to I-15 and a city-owned park, we are concerned with public access and pedestrian safety near the restored ponds and wetlands.	Carol R. Page, Davis County Commission Chair Charles W. Chappell, WFRC, UDOT, Kaysville City, URMCC, DWR
Utah Open Lands	<i>Perkins Flat - Emigration Canyon</i>	\$350,000					this property was the last camp the Mormon Pioneers used before entering the Salt Lake Valley. Abuts Emigration Canyon Road, a Scenic Byway and part of the route of the California Overland trail, the Pony Express and Mormon Pioneer Trails.	Army Corps of Engineers, Utah Div. of Water Rights, DWR, SL County Mayor, Trout Unlimited, Emigration Canyon Community Council, Emigration Community Trails & Open Space Committee, The SL County Open Lands Committee, The SL County Council, and Utah Historic Trails Consortium
Division of Wildlife Resources	<i>Sandwash/Sink Draw Conservation Easement</i>	\$225,000					The property is classified as critical winter habitat for sage-grouse. It is also critical winter range for deer and elk. Sage-grouse from the Strawberry Valley winter on the property, and one lek exists on the parcel.	County

Department of Agriculture and Food	<i>Trout of Paradise</i>	200,000		700,000	\$900,000	179	The Brooke Ranch easement and this property provide impressive wildlife habitat. Wildlife groups in Cache County have put \$thousands into this habitat. Today, the ranch produces cattle, crops, trout, pheasants and partridge. As late as 1989 the Whites produced more than seven million pounds of trout annually from the property. In 1990, Whites began a costly disease disinfection, forcing the fishery in a different direction. Utilizing the original natural stream beds, the spring waters now flow as they did in the late 1800's. The two miles of streams and spring-fed lakes provide for year-round trophy fly-fishing. 178.91 Acres will be held in a perpetual easement .	BlackSmith Fork Soil Conservation District -Paradise City, Mayor -UDAF, Commissioner of Agriculture -Legislator -Farm Bureau -UDW utah -USU- Terry Messmer -Cache County Ag Advisory board -Cache County Planning Commission
Utah Open Lands	Richins Ranch	400,000		2,539,000	\$2,939,000	1208	The Richins Ranch is key Sage Grouse habitat and has significant Ranching heritage. The property provides an active lek (the traditional strutting ground), and is identified by the DWR as critical brooding and winter habitat. Also, the conservation of this property continues preservation efforts along Utah's famed historic trails. The Richins Ranch is 2808 acres. Utah Open Lands requests funding for the 2nd phase of 1200 acres. About 1600 acres are critical brooding and winter range for the Sage Grouse. The entire ranch serves as habitat for deer and elk. The ranch is adjacent to other protected lands.	Eastern Summit County Agricultural Preservation fund, Rep Ure, Summit County Commission, Basin Open Space Advisory Committee, DWR

LERAY MCALLISTER CRITICAL LAND CONSERVATION FUND

Location	Project Title	McAllister Grant	Federal Match	Total Match	Total Cost	Acreage	Project Description	Local Support
Nature Conservancy	<i>Virgin River Headwaters Project</i>	300,000	1,800,000	4,897,000	\$5,197,000	3562	The VRH Project consists of lands that have historically been grazed by sheep and cattle. Small family cabins exist on the properties and they are used as a summer retreat for the ranching families. The VRHP is located in the scenic high plateau country just north of Zion National Park. Eighteen landowners have come together to form the Kanarra Mountain Landowners Association to work on protection up to 11,000 acres of critical wildlife habitat and watershed. These properties provide high quality forest resources, unique wildlife habitat and critical watershed to LaVerkin Creek and the Virgin River.	Washington County Commission Members Iron County Commission
Nature Conservancy	<i>Selman Ranch Conservation Project 2*</i>	90,000	700000	4,159,916	\$4,249,916*		Placing a conservation easement on the Selman Ranch will protect key targets such as Columbian sharp-tailed grouse, Bonneville cutthroat trout and potential habitat for the boreal toad, Brewer's sparrow and goshawk, by removing the threat of habitat loss and connectivity due to development. Developing a resource management plan will address habitat improvements, invasive species and sustainable logging. Grazing will be allowed once the breeding period is over for sharp-tailed grouse.	
Salt Lake City	<i>Foothill Preservation Project</i>	195,000		1,755,000	\$1,950,000	16	The property is open space with no improvements. It is used by pedestrians as an access point for the Bonneville Shoreline Trail (BST). The property offer unique panoramas of the Salt Lake Valley. Funds would be used to purchase parcels totaling 6.51 acres. The property owner will sell 3.24 acres and has agreed to donate the remaining 3.26 acres. If purchased the parcels would be part of the Foothill Nature Preserve (FNP), a 101 acre undeveloped area stretching from 1700 South to 2100 South. The FNP would be maintained as a Salt Lake City park and would allow access to National Forest Service Land to the east. The FNP would remain undeveloped with trails for all ability levels.	East Bench Community Council, Councilman Dave Buhler, Senator Karen Hale, Representative Roz McGee

Trust for Public Land	<i>Glenn Family Farm</i>	240,000	751,000	841,000	\$1,081,000	165	Acquisition of a conservation easement over the Glenn Family Farm was deemed a high priority by TPL because the farm contains more than 90% prime farmland and soils of statewide and local significance. Representatives of the Bear River Association of Governments confirmed that evaluation of this farm's soils resulted in the highest Land Evaluation and Site Assessment (LESA) scores ever calculated by BRAG. The proposed conservation easement would restrict future development to ensure that the land remains available for continued agricultural production in perpetuity.	Cache Valley Agricultural advisory Board and UDAF
Weber Pathways	<i>Weber River Parkway</i>	25,000		57,900	\$82,900	17	Weber Pathways is working with South Weber, Uintah, Davis and Weber Counties, and UDWR to secure the trail corridor. 14 separate landowners have been identified along this corridor. Three representative parcels have been appraised. Based on these appraisals, Weber Pathways estimates a total of \$450,000 is needed to acquire all of the parcels. The parcels will be acquired over three years. In this first phase of acquisition of the trail corridor, WP has identified three parcels of land totaling 17.155 acres for which they are requesting \$44,225 for assistance in purchasing. These parcels are in South Weber City, located between the river and I-84.	Weber County Utah Division of Wildlife Resources UDOT Davis County South Weber City Town of Uintah Senator Dave Thomas Rep. Brad Dee Wasatch Audubon Society Trout Unlimited Back Country Horsemen/Wasatch Front

<b>Ten Grants Awarded 2007</b>								
statewide	<i>Emergency Wildfire Reseeding</i>	200,000	48,512,000	54,286,319	\$54,486,319		The Commission Contributed to the statewide wild fire restoration funding in the amount of \$200,000 from the LeRay McAllister Fund. These funds will be used to restore fire damaged lands throughout Utah.	
Cache County	<i>American West Heritage Center Farmland Preserve</i>	75,000		200,000	\$275,000	55	American West Heritage Center acquired 100 acres adjacent to their facility to prevent propoosed development that would mare the view they have of the wellsville mountains. The county is proposing to acquire a conservation easement on 55 of these acres to preserve them in perpetuity, and assist the center with this acquisition. These acres will be used for agricultural purposes, and will enhance public access and enjoyment of this site.	Cache County
Cache County, near Smithfield	<i>Gittins/Woodlee Dairy</i>	500,000	695,000	890,000	\$1,390,000	68	Preserves prime farmland for the Gittins Family Dairy Farm. Some land bordering this property has recently been sold for estate homes, and family would like to prevent that from happening on their property. Also, the property is in the approach zone for the Logan Airport. The this is phase two of the project and will complete the easement on the property. This project has received almost \$700,000 in federal Farm and Ranch Land Protect funds for this easement	Cache County, City of Smithfield

Carbon County	<i>Rainbow Glass Ranch, Phase 3</i>	350,000		680,000	\$1,030,000	2393	Located in the Range Creek focus area of the Utah Forest Legacy Program, the property is a large tract of generally pristine mountain land of overall scenic beauty. It contains numerous springs, timber resources and a variety of wildlife. The proposed easement would protect the Grassy Trail watershed and reservoir, which supplies water to the Sunnyside and East Carbon communities. Forest Legacy closed Phase 1 of the project in 2004 with a landowner donation of 800 acres. Phase 2 (2,280 acres) closed in 2006. The remaining 2,393 acres, for which this funding request is made, will be placed under easement in 2007. An easement on the remaining 2,393 acres of the ranch would prevent potential division into 100 building lots. There is significant development pressure in the area for recreational properties and cabin sites. An adjacent 4,500 acre property has been subdivided into 40-acre "ranchettes", and is zoned to permit "mountain developments and planned home developments". A recent development in Argyle Canyon, just five miles from the Rainbow Glass Ranch, includes 100 cabin sites. The Ranch is also 30 minutes from another cabin development at Joe's Valley.	Carbon County, East Carbon, Sunnyside
Sanpete County, near Mt. Pleasant	Nuttall Property	105,000	120,000	921,000	\$1,026,000	354	Two landowners in Sanpete County are interested in selling conservation easements on their riparian habitat along the Sanpitch River and donating conservation easements on their upland property as a match. The property that would be protected with this grant contains vital habitat for the Columbia spotted frog, designated as a Tier I species on the Utah Sensitive Species List and is the subject of a multi-agency conservation plan and the leatherside chub, which is a Tier II species on the list. The conservation easements will be south of the Lauritzen property on which the DWR currently holds a conservation easement. The amount of funds requested are based on the \$3000 per acre that was paid for the Lauretzen easement in 2005, so there is a decent chance that an appraisal will reflect a higher per acre value in the full application. We will be purchasing conservation easements on 90 acres and the landowners are donating conservation easements on the remaining 264 acres of their land.	Sanpete County, Mt. Pleasant City

Santa Clara City, Washington County	<i>Santa Clara Arboretum Restoration Project</i>	30,000		46,875	\$76,875	15	<p>The Santa Clara Arboretum Restoration project is a continuation of the project initially funded in 2004. Phase II encompasses the lower section of the Arboretum where the Tuachan Wash opens up into a broad, flat low land. Phase I funding (2004) paid for new vegetation in the cactus garden, some tamarisk eradication, a detailed plan for the Arboretum, wildflower seeds, tools, and valuable soil for planting. Phase II funding will continue the restoration and principally support the following efforts:</p> <p>(1) eradicating invasive weeds and restoring the natural contours to the land after past tamarisk removal  (2) restoring stream banks along the natural flows in the wash  (3) planting native vegetation in the wash bottom and along stream banks  (4) establishing a water system for supportive irrigation at the onset of planting and during times of severe drought  (5) establishing a small pond for wildlife  (6) eradicating additional tamarisk</p>	Washington County, Santa Clara City
Washington and Iron Counties Near Kannarraville	<i>Virgin River Headwaters Project, Phase 2</i>	650,000		2,397,300	\$3,047,300	1602	<p>The VRHP is located in the scenic high plateau country just north of Zion National Park. Eighteen landowners have come together to form the Kanarra Mountain Landowners Association to work on protection up to 11,000 acres of critical wildlife habitat and watershed. These properties provide high quality forest resources, unique wildlife habitat and critical watershed to LaVerkin Creek and the Virgin River. Phase 2 will preserve 3 parcels.</p>	Washington County, Iron County, Kannarra Mountain Landowners Association
Salt Lake County, South Jordan City	<i>Audubon/Tree Utah Migratory Bird Habitat Restoration Phase 4</i>	20,000	40,000	132,750	\$152,750	20	<p>The project objective is to restore high quality migratory bird habitat along the Jordan River. This includes reactivating and enhancing old meanders, enhancing the Willow Creek Channel, the removal of exotic species and planting native species. This project is supported by thousands of volunteers, and has worked successfully in this area for more than five years. This is the third time the commission has considered funding for this project.</p>	South Jordan City, Salt Lake County

Location	Project Title	McAllister Grant	Federal Match	Total Match	Total Cost	Acreage	Project Description	Local Support
							The project seeks funding to complete the second of a two-phase conservation easement purchase over OW Ranch. Phase 1, totaling 140 acres was completed in January of 2007. This project would place an additional 60 acres under easement. The easements are held by Utah Department of Agriculture and Food for long-term management. Preservation of OW Ranch critical because of the land's high quality soils and its special location along the Weber River. The ranch's rich riparian areas (approximately 32 acres) include woodland consisting of cottonwoods, river birch and black willow, with an understory of native grasses and shrubs. These areas serve as a well-populated winter roosting area for the American bald eagle and provide habitat for deer, ducks, cranes, and other resident and migratory birds and mammals. The Utah Division of Wildlife Resources has designated the Weber River along this stretch as a "Blue Ribbon Fishery." The proposed conservation easement would restrict future development, preserving the riparian habitat and maintaining the ranch.	
Summit County	OW Ranch Easement Phase 2	350,000	1,010,000	1,975,250	\$2,325,250	200		Summit County

Summit County	South Fork Ranch	500,000	1,325,850	2,533,850	\$3,033,850	2350	stands and aspen. The Utah Division of Wildlife Resources (DWR) has record of the following threatened, endangered, or sensitive species in the general area: peregrine falcon, bald eagle, northern goshawk and perhaps whooping crane migration paths. Mule deer, elk and moose habitat in the area is considered high priority winter range providing winter habitat for the North Slope of the Uintas on this and the surrounding 15,000 acres. A bald eagle winter nesting site provides habitat for 12 nesting pairs. Other important species include cougar, coyote, bobcat, fox, turkey, chukkers, sandhill crane, snowshoe hare, sage grouse, and western toad. The South Fork of Chalk Creek flows through the entire property. The South Fork is considered a Class I stream, as it contributes to downstream fisheries. It has been identified as a priority stream and priority wildlife habitat (high wildlife value) area by DWR. Bonneville cutthroat trout are present in the creek and considered a Utah sensitive species. Extensive work has been done on the property through the Chalk Creek Restoration Project providing riparian fencing, willow planting, and rock jetties to create	Summit County CommissionSummit County Commission, Forest Stewardship Coordinating Committee, Division of Wildlife Resources, Eastern Summit Co. Open Space & Ag preservation committee
Cache County	Curtis Farm	115,000		792,000	\$907,000	357	This is 357 acres adjacent to the 1,563 acre Brooks Ranch, [Jon White] conservation easement in the south bench of Cache County, and the Town of Paradise. The Brooks Ranch borders this property on the south for approximately 1.5 miles. Developers have subdivided the land to the easement of this parcel. This is valuable agricultural land adjacent to other conserved lands. It is critical deer and elk winter range, and important sage grouse habitat.	Cache County Agricultural Advisory Committee, Rocky Mountain Elk Foundation
Cache County	Elkhorn Ranch	320,000	505,000	1,040,000	\$1,360,000	167.5	Preserve 3 adjoining farms located near the Blacksmith Fork River. Protects open space and agricultural land next to three adjoining towns, and preserves the historic Elkhorn Ranch, one of the first ranches in Cache Valley	Cache County, Millville City, Nibley City, UDAF

LERAY MCALLISTER CRITICAL LAND CONSERVATION FUND

Location	Project Title	McAllister Grant	Federal Match	Total Match	Total Cost	Acreage	Project Description	Local Support
Utah County	Lindon Hollow Wetlands	150,000		2,449,523	\$2,599,523	14	that is functioning primarily as a drainage area for the Lindon Hollow Ditch, which flows year-round and also carries storm water from Lindon, Orem, Pleasant Grove, and Cedar Hills. In addition to the open space preservation, Orem and Lindon City hope to utilize the drainage area for storm-water retention and natural 'clean-up' before the water enters Utah Lake which is ¼ mile to the west. Lindon City recently purchased right-of-way for the Lindon Heritage Trail which runs along the north border of the open space area (see map) and is planned to connect the Bonneville Shoreline trail to the Utah Lake Trail. The open space will be a benefit to the trail users for its natural and aesthetic qualities. Industrial uses surround the site and it is threatened by future development. Areas of the drainage have been filled in the past and the open space and storm water retention / clean-up potential is slowly disappearing. Anderson Geneva Development Inc currently owns the property and has indicated that if a buyer for the property is not found, they hope to pipe the ditch, dry up the drainage area, fill the open space, and develop	Lindon City, Orem City, Town of Vineyard, DWR, Utah Lake Commission, Rep. Grover, Senator Dayton
Utah County	City of Salem	75,000		4,425,000	\$4,500,000	33	The open space being restored will begin the salem parkway trail and set a standard for other property owners located along the proposed Salem Parkway. This area was recently described by a representative of the Army Corps of Engineers as being one of the most perfect wetland areas in Utah County. With the impending development activities that is assuredly coming forth, this area should become a high land preservation concern to the State. The subject property is located on the northern tip of the Salem valley area which is part of a contiguous parcel that consists of hundreds of acres of similar property. By preserving , protecting and enhancing bird habitat and its associated wetlands that is allocated within the proposed Salem Parkways the chances are continually greater that other adjacent land owners will follow the vision. The Parkway will allow the public to use the system and its recreational aspects, but protect the wetlands from human interaction.	City of Salem

Location	Project Title	McAllister Grant	Federal Match	Total Match	Total Cost	Acreage	Project Description	Local Support
Washington County	Pine Valley Meadows Preservation Project	200,000		1,044,000	\$1,244,000	24	The property has been used for ranching/farming/grazing since the mid-1800's when pioneers and their livestock retreated from the heat of the desert communities around St. George to the lush mountain meadows of Pine Valley. This phase of the Pine Valley Meadows Preservation Project protects nearly 24 highly sensitive acres in the meadows and is adjacent to 10 acres which were protected in 2005. When completed, the project could protect over 200 acres of the most sensitive critical lands in the meadows. Preservation of the meadows preserves the scenic and historical qualities of the valley, protects agricultural lands, protects the watershed of the Santa Clara River, provides for protection of the floodplain and reduces potential property losses associated with flooding, protects wildlife and riparian habitat, and enhances the recreational experience of all those who travel through the valley to enjoy the Dixie National Forest.	Washington County Commission, Pine Valley Irrigation Company, Pine Valley Special Services District, Rep. Clark, Sen. Hickman
Salt Lake county	TreeUtah/Audubon Migratory Bird Habitat Restoration Phase 4	25,000	40,000	159,550	\$184,550		The land we are working with is undeveloped open space. We are currently in the process of restoring it. Historically the property has been use for agriculture, primarily for grazing livestock. The project objective is to restore high quality migratory bird habitat along the Jordan River. This includes reactivating and enhancing old meanders, enhancing the Willow Creek Channel, the removal of exotic species and planting native species.	URMC Commission, Senator Buttars, Representative Newbold, Mayor W. Kent Money
Weber County	Taylor's Buffalo Springs	250,000	275,000	568,000	\$818,000	29.3	Agriculture, woodlands, flood-plain, and wetlands including an ox-bow pond consisting of the old channel of the Weber River. Purpose of the easement is preservation of prime agriculture farmland. Preservation of wildlife habitat and wetlands. Provides needed storm water retention and recharge area.	Rep. Kerry Gibson, Marriott-Slaterville City, Weber County – Commissioner Dearden

Iron County	Dry Lakes Ranch	75,000	1,400,000	1,792,000	\$1,867,000	1862	Dry Lakes Ranch is located adjacent to Brian Head Scenic Byway. It sits below the Town of Brian Head, a resort area for summer and winter recreation including a ski resort. The byway provides direct access through dramatic Parowan Canyon to the Dixie National Forest, Ashdown Gorge Wilderness Area, and Cedar Breaks National Monument. Foreseted with aspen, white fir, spruce, Gambel Oak and mountain mahogany, the Ranch provides crucial habitat for fawning mule deer, and calving Rocky Mountain Elk, crucial summer range for Merriam's Turkey and year-round range for blue grouse. Sensitive species in the area include the three-toed woodpecker, Sonoran Mountain king snake, goshawk and pika; and federally protected species including the California Condor and Mexican Spotted Owl. The ranch continues to be a working cattle ranch. Ranch owners trail their cattle up the canyon from Parowan every spring and trail them down again in the fall.	Iron County Local Legislators
Salt Lake County	Killyon Canyon Watershed Preserve	100,000		2,650,000	\$2,750,000	265	Killyon Canyon is a unique natural area within 15 minutes of downtown Salt Lake City. The 265 acres proposed by Utah Open Lands would protect watershed, wildlife habitat, public access to this property plus access to adjacent public lands. This project also leverages open spaces already preserved by protecting additional adjacent open space.	Salt Lake County, Salt Lake City, local legislators

Utah Division of Forestry, Fire and State Lands, Phase 1	Green Canyon Ranch Project	\$250,000	\$1,455,125	\$1,455,125	\$1,705,125	2500	The project is to purchase a 2800 acre conservation easement in Blacksmith Fork. The project is adjacent to the Uintah-Wasatch-Cache National Forest. The property provides critical winter range for mule deer and elk as well as year round habitat for the Columbia sharp-tailed grouse, a state sensitive species. Green Canyon's 4.5 mile northern boundary runs along the scenic Blacksmith Fork river, a "Blue Ribbon" trout stream. Brown and rainbow trout are the primary species. The river also provides habitat for the Bonneville cutthroat trout, a state sensitive species. Douglas-fir, sub-alpine fir and quaking aspen are the primary forest species. Perched above the towns of Hyrum and Paradise, the project area provides much of the culinary water for both. Green Canyon has been owned by the landowner and his family since 1906. They use the land for timber harvesting, seasonal grazing of 40-50 cow/calf pairs, as well as recreation. The landowner has a deep conservation ethic and has already put all of his cropland into the Farmland Ranch Protection Program and strongly desires to keep this property in its pristine condition and protected from development as well.	FFSL, USFS
Trust for Public Land	Zion Chamberlain Ranch	313,500	986,500	1,286,500		280	This project is located at the trailhead for the Zion Narrows. The Narrows trail traverses the property before entering public land. The project preserves public access to the Narrows trail, and also preserves the critical riparian habitat to protect water quality in Washington County, and to protect habitat for various wildlife species.	Washington County Water Conservancy District, Zion National Park
Virgin River Land Preservation Association	East Zion Meadows	210,000		260,000	\$470,000	250	The land is currently used for grazing a herd of Buffalo. The agricultural use will continue under the easement. In addition to the buffalo, the land is used for cattle grazing, and wildlife, such as deer, foxes, coyotes, as well as other animals and birds. The land provides incredible views and vistas. It is on the road leading to east entrance to Zion National Park, and provides an important enhancement to this corridor.	Town of Springdale, Town of Rockville, Zion National Park, Zion Natural History Association
